

Consultation in the comfort of your home

As a first-time parent you are now entitled to receive **six home visits** during your child's first 15 months.

Two people, one from the child health care services and one from the social services, will visit you at home to answer your questions. These might be about your child's development, your role as parent, or suggestions for where you can meet other parents.

Home visits are a collaboration between Region Västra Götaland and the City of Gothenburg, and are offered to all first-time parents registered at child health care centres (BVCs) in a number of areas in Gothenburg.

Contact your BVC for further information.
